ATTEMPT GREAT THINGS FOR GOD

START A CELL GROUP

Cell groups are the biggest training ground for a minister of the Gospel. Never ignore the power of cell group ministry in shaping pastoral skills for a Man of God.

I learnt how to preach at a cell group and also sharpened my pastoral skills at the cell group as well. It is very possible for one to have several cell groups that they run in a week. Imagine if you have 5 cell groups with 4 people each, you will be bringing 20 people to church every Sunday. If those cell groups grow to 10 people each, they become an assembly.

No one is exempted from starting and leading a cell group. I also want to start my own cell groups as a way of evangelism. You do not have to wait until it is night to hold a cell meeting. Some can be done in the afternoon if the people are available, why wait until it is night?

What is needed in starting a cell group?

1. You need a venue.

You can turn your house into a venue and bring a neighbour or colleagues to discuss the Word of God. Do not call those who are far, start with those near you.

Someone can also open their houses for you, that would be a great opportunity. Start with that family and bring more people. Someone may give his or her work station for example a salon, a market store, then gather as many people as you can and make your preaching very short because

people are at work. Do not forget to pray for the sick and to pray for the blessing of God to come upon the people.

2. You need to advertise.

Put a flyer and distribute in the area around the cell group venue. Encourage your cell members to use the flyer to invite others.

NB: Be comfortable to minister to few people. Do not get discouraged ministering to one family. If you are faithful with a few then God will give you more souls in that area.

If you are busy during the week, you can set your cell group to run on a Saturday afternoon or evening. It may not be an ideal time and day but as long as you are doing something for God.

Attempt great things for God this season. Start a cell.
